1.7 - 7 - 0  
Liquid Concentrate

Fish-bone phosphorus enhanced cold-processed fish hydrolysate for root and shoot development

## Promote Plant & Soil Health

### Integral Nutrients

Never heat-treated to protect nutrients from marine protein, shell, oil, and fish bone.

### Key Phosphorus

Support phosphorus uptake with soluble bone & crab stabilized with phos acid.

### Feed Beneficial Fungi

Contains 6-10% fish oil and fatty acids.

## Bioavailable Phosphorus for Optimal Root Growth

Primes soil systems pre-plant & at planting

Phosphorus from marine bone is delivered in a bioavailable form

Notable ROI in spring programs  
Derived from micronized fish bone, fish protein hydrolysate, and stabilized with phosphoric acid

### Healthy soils built by Nautical provide:

- Amplified soil humus, including long & short chain carbon molecules
- Improved soil aggregation
- Balanced soil pH
- Balanced micro and macro nutrients
- Increased nutrient availability
- Improved water holding capacity
- Improved water infiltration
- Decreased salinity

# AgVent Kraken™

AgVent Kraken is a cold-processed fish hydrolysate with a unique process to solubilize added fish bone to deliver bioavailable phosphorus in a ready-to-use liquid concentrate.
