

 **Sphere o' Life**
NitroHawk 6-0-0

Combines **chicken manure and soy protein hydrolysate** to provide a nutrient-rich, organic source of nitrogen that enhances soil fertility, promotes microbial activity, and improves plant growth

Using recycled waste from poultry farming to reduce reliance on synthetic fertilizers and promote sustainable agriculture

Benefits

- ✔ Contains **organic nitrogen** which is essential for plant growth, plus other vital nutrients
- ✔ Readily available **amino acids** enhance growth, stress resistance and overall health
- ✔ Adding **organic matter** to the soil improves soil structure, aeration, water holding capacity, and promotes microbial activity
- ✔ Stimulates **beneficial microbial** activity in the soil, enhancing nutrient cycling and soil health
- ✔ Improves the **uptake of other nutrients** in the soil enhancing nutrient use efficiency
- ✔ **Slow release profile** to provide steady source of nitrogen and reducing the risk of nitrogen leaching
- ✔ Improves **tolerance to abiotic stresses** such as drought, salinity and extreme temperatures

Application

Application Rate = 1-5 gal/ac
