

introducing **AgVent**  
**Kraken™ O**  
**1.7 - 6 - 0**  
**Liquid Concentrate**

**Fish-bone phosphorus enhanced cold-processed fish hydrolysate for root and shoot development**

**Promote Plant & Soil Health**

**Integral Nutrients**

Never heat-treated to protect nutrients from marine protein, shell, oil, and fish bone.

**Key Phosphorus**

Support phosphorus uptake with soluble bone & crab stabilized with phos acid.

**Feed Beneficial Fungi**

Contains 6-10% fish oil and fatty acids.

**Bioavailable Phosphorus for Optimal Root Growth**

 Primes soil systems pre-plant & at planting

 Phosphorus from marine bone is delivered in a bioavailable form

 Notable ROI in spring programs

 Derived from micronized fish bone, fish protein hydrolysate, and stabilized with phosphoric acid

**Healthy soils built by Nautical provide:**

-  Amplified soil humus, including long & short chain carbon molecules
-  Improved soil aggregation
-  Balanced soil pH
-  Balanced micro and macro nutrients
-  Increased nutrient availability
-  Improved water holding capacity
-  Improved water infiltration
-  Decreased salinity

**AgVent Kraken O is a cold-processed fish hydrolysate with a unique process to solubilize added fish bone to deliver bioavailable phosphorus in a ready-to-use liquid concentrate.**
